SIDDHARAJSINH RATHOD

Software Developer

📞 8154953144 ✉ contact.developer.siddharaj@gmail.com 📍 Vadodara, Gujarat in siddharajsinh-rathod ⌂ siddhraj-sinh

Aspiring a comprehensive work domain a position where I can leverage my technical as well as generic skills. I intend to add value to the institutional growth by expressing my optimistic and analytical competence.

EXPERIENCE

Software Engineer - I
Promact Infotech Pvt Ltd

📅 Jun 2023 – Present   📍 On-site

- Develop and maintain scalable web applications using .NET and Angular.
- Implement role-based authentication and social login (Google, Apple) using Auth0, with post-login workflows like role assignment and account merging.
- Integrated Google invisible reCAPTCHA v2 and middleware for security features, including rate limiting.
- Set up log routing to the ELK stack for real-time monitoring and performance optimization.
- Optimize database performance by implementing Redis cache for storing flags and frequently accessed data
- Developed .NET APIs for Azure AI search, enhancing data retrieval.
- Led infrastructure migration from AWS to Azure and handled production and staging deployments.
- Contributed to the team collaboration feature for Bharat Law, applying CLEAN architecture principles.
- Integrated Brevo for email marketing automation.

- integrated CMS for newly created website
- made use of FTP software FireZilla

Android Developer Intern
StackX Technologies

📅 Jun 2022 – July 2022   📍 Hybrid

- Converted design into code.
- Identified and fixed serveral bugs.
- Analyzed firebase crashlytics and resolved ANRs.
- learned about devops tools like Atlassian JIRA & Confluence.

EDUCATION

B. Tech in Information & Communication Technology
Pandit Deendayal Energy University

📅 August 2019-May 2023   📍 Gandhinagar, Gujrat

CGPA: 9.5/10

TECHNICAL SKILLS

.NET Core   Entity Framework Core
Web API   Angular   Java   Kotlin
Python (Intermediate)   HTML and CSS
Javascript   React Js   Node js
Express Js   XML   Firebase (Intermediate)
Android Studio   GitHub Actions

PROJECTS

Note It - Android App
Kotlin(Android Studio), Figma
- Note-It is intuitive note-taking app
- it is available on **Google PlayStore** with 2500+ downloads
- Features: creation and editing of text notes • user can share notes • password-protected notes • dark theme support • FAQs guide

Resume Screnning - Web App
Python, Google-Colab, NLP
- Aim of this project is to find whether a candidate is qualified for a role based his or her education, experience, and other information captured on their resume.
- Based on the matching found between job-description & candidate's resume output be shown in terms of percentage

Birds-Recoginition - Android App
Kotlin(Android Studio), TensorflowLite
- It is image-classification Android App.
- Based on image-capture it predicts birds name. I have used **TensorFlow lite Model** for prediction.
- I have also written blog post on **Medium** detailing how I made this.
